Human Immunology

Official Journal of the American Society
for Histocompatibility and Immunogenetics

Volume 38, 1993

Elsevier

Human Immunology

Aims and Scope

Human Immunology offers an exchange of information and ideas centering on the immunological system of humans. Pertinent information about the analogous systems of other vertebrates, including fish, birds, and mammals, may also be appropriate. The genes of the major histocompatibility complex and of T, B, and accessory cells and their products as regulatory molecules, disease markers, receptors, or targets are relevant topics. Subdisciplines such as neuroimmunology, immunopharmacology, and developmental and reproductive immunology are also considered insofar as they provide new insights. Limited space is available for reporting technological advances. Rapid publication of newsworthy items is provided by brief reports. Topics of general concern form the basis for editorials and seminar series.

THE MOST CITED PUBLICATION IN DERMATOLOGY, YEAR AFTER YEAR

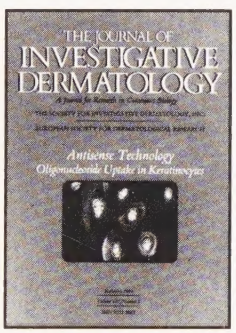
THE JOURNAL OF INVESTIGATIVE DERMATOLOGY

A Journal for Research in Cutaneous Biology

OFFICIAL JOURNAL OF THE SOCIETY FOR INVESTIGATIVE DERMATOLOGY AND THE EUROPEAN SOCIETY FOR DERMATOLOGIC RESEARCH

Editor: Edward O'Keefe, University of North Carolina, Chapel Hill, NC

Year after year, the most frequently cited publication in dermatology is **The Journal of Investigative Dermatology**. According to the Institute for Scientific Information, this journal was cited more then 10,800 times in 1992 alone. The 1992 Science Citation Index ranked **The Journal of Investigative Dermatology** 1 out of 27 publications in its category.



This exceptional record and the prestige of the journal among researchers are based on the quality of the research it publishes.

The Journal of Investigative Dermatology offers the most inclusive multidisciplinary coverage of investigative dermatology. It is the only journal that maintains an internationally recognized editor in each of these fields:

- keratinocyte biology
- melanocyte biology
- pharmacology/percutaneous absorption
- immunology
- extracellular matrix
- biochemistry
- cell biology
- genetics
- biophysical properties
- oncogenesis/virology
- photobiology/carcinogenesis
- biologic structure and function
- dermatopathology

This unique editorial structure ensures that original research articles and ongoing investigation reports are at the cutting edge and of the highest quality...and that all relevant disciplines are represented with consistent technical depth.

Special Supplement: Proceedings of the Annual Symposium on the Biology of the Skin

A subscription to **The Journal of Investigative Dermatology** includes 12 monthly issues and a special supplement: the proceedings of the Annual Symposium on the Biology of the Skin. Proceedings of this major conference —the "Salishan Symposium"—give researchers a valuable yearly record of significant papers in cutaneous biology.

Abstracted/Indexed in Biological Abstracts, Current Contents, Excerpta Medica, International Pharmaceutical Abstracts, Index Medicus, Nutritional Abstracts, and Reference Update.

CLINICS IN Dermatology

Editor-in-Chief:
Lawrence Charles Parish, MD, Philadelphia, PA

Clinics in Dermatology is a quarterly journal that brings you the most practical and comprehensive information on the treatment and care of skin disorders. Each issue is devoted to a single timely topic relating to clinical dermatology.

Clinics in Dermatology brings you information that is...

- *Clinically oriented* – from evaluation to treatment, **Clinics in Dermatology** covers what is most relevant to you in your practice.
- *Authoritative* – World-renowned experts in the field assure the high-quality and currency of each issue by reporting on their areas of expertise.
- *Well-Illustrated* – Each quarterly issue is complete with photos, drawings and diagrams to illustrate points and demonstrate techniques.

1994 Subscription Information
ISSN **0738-081X** Volume 12 (4 issues)
Personal Rate: $95.00*
Institutional Rate: $165.00
Intern/Resident Rate: $59.00†
Subscribers outside the U.S., please add $26.00 for postage and handling.

Note: Subscriptions begin with the first issue of the calendar year and are entered upon receipt of payment. Rates valid through December 31, 1994. Please allow 4-6 weeks for delivery of your first issue.
*Personal subscriptions must be paid by personal check or credit card.
†Intern/Resident rate is valid for two years only.

COVERING BOTH THE TECHNICAL AND THE PATIENT SIDE OF CLINICAL IMMUNOLOGY

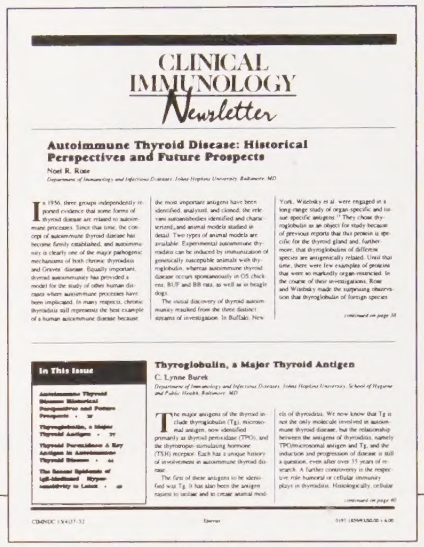
CLINICAL IMMUNOLOGY NEWSLETTER

Editor:

Maurice (Mo) R.G. O'Gorman, MSc, PhD,
The Children's Memorial Hospital,
Chicago, Illinois

Where the world's best research becomes solutions for your daily work

For clinical immunologists, here's today's only monthly source of clinically-focused working information from across the field of immunology. Each issue is devoted to a major topic in the field, and transforms research from the world's foremost clinics and laboratories into ideas and methods you'll apply to your daily work.



CLINICAL IMMUNOLOGY Newsletter

Autoimmune Thyroid Disease: Historical Perspectives and Future Prospects

Noel R. Rose

Thyroglobulin, a Major Thyroid Antigen

C. Lynne Burek

1994 Subscription Information

ISSN 0197-1859
Volume 14 (12 issues)
Subscription Rate: $168.00

Subscribers outside North America, please add $49.00 for postage and handling.

Professional reading from those who are more than professional *readers*...

Coverage here avoids the theoretic and esoteric, in favor of a staunch clinical emphasis. Issues alternate between a "patient" and "technical" focus.

In technical issues you'll explore such topics as:

- analytical methods for antigens and antibodies
- quality control and quality assurance
- personnel standards and qualifications
- new products and assays
- regulatory, legislative, and economic issues affecting the clinical immunology laboratory

Issues devoted to direct patient care offer insight into:

- immunodeficiency
- transplantation
- autoimmune disease
- allergic disease
- cancer immunology
- infectious disease

As a subscriber, you'll enjoy point/counterpoint explorations of controversial subjects, illuminating case reports, evaluations and comparisons of the latest tools and techniques, original articles, reviews and references you'll use to further your research.

Keep your lab's diagnostic work at the forefront of clinical immunology. Enter your subscription today!
